

I believe you should not move to deregulate or loosen further the rules on media ownership - we already have way too much concentration. Don't make it easier for companies to own more of the market than it is now. Hold more hearings and get more opinions, but the June 6 vote is both premature and not the right way to go. We need more owners of the public air waves and other media sources. If not we lose our democracy which is what makes this country great.

Thank you.
